## DATA SHEET: iElevate®

About: The iElevate® stage platform is the world's leading drill driven permanently anchored stage platform, giving you the ability to raise and lower individual platforms in less than a minute with a corded drill, creating increased versatility and flexibility in your venue.

Suitable for: Orchestra pit fillers, seating risers, stage extensions, performance staging, modular staging.

- Steel and aluminium frame construction options are designed for ultimate strength and long-lasting durability.
- Millimetre perfect travel positioning means that the iElevate® Stage can stop anywhere during its ultimate travel limits.
- Surface options to suit your venue
- Exclusive iStudio Projects extrusion means that the iElevate® Stage is compatible with a host of accessories (guardrail, skirting, fascia panels, etc.)
- Ability to lock adjacent platforms together to provide a seamless surface, or standalone as a singular system.
